Professional Summary

Results-driven Backend Developer with 1.5+ years of experience building scalable microservices, high-performance APIs, and distributed systems using Java, Kotlin, Spring Boot, and event-driven architectures. Proven ability to optimize system performance, integrate third-party services, and deliver end-to-end solutions with strong ownership. Recognized for problem-solving, fast learning, and delivering production-ready features.

Experience

Backend Developer — Stable One Software Pvt. Ltd.

Sept 2024 – Present

- Developed and maintained **11+ microservices** using Spring Boot (Java/Kotlin), improving system efficiency and feature scalability.
- Designed RESTful APIs with OpenAPI/Swagger, reducing integration issues by **30%**.
- Integrated multiple third-party APIs (payments, KYC, geolocation) enabling secure, high-availability transactions.
- Implemented event-driven architecture using **RabbitMQ**, improving asynchronous processing and system responsiveness.
- Optimized performance using **Redis caching**, reducing load on core DB and boosting response time by **40%**.
- Contributed to UI work with **Angular 19+**, collaborating with product and design teams.
- Followed Agile practices, CI/CD pipelines (GitHub Actions, Jenkins), and test-driven development for reliable deployments.

Major Project

Educare Carefully Institute — Full Project Delivery (Version 1.0)

Role: Backend + Frontend Developer

Tech: Node.js, Express.js, Angular.js, MongoDB, Vercel, Render

Delivered the complete Version 1.0 of an education-management platform as the Backend Developer, Frontend Contributor, and Primary Database Designer, serving 15,000+ students and 50+ franchise centers, handling 20,000+ monthly requests. serving **15,000+ students** and **50+ franchise centers**, handling **20,000+ monthly requests**.

Key Achievements:

- Delivered full backend API and frontend application, deployed on Vercel + Render with MongoDB.
- Built end to end workflows: student registration, franchise operations, admin dashboards, course/content access.
- Provided production-ready deliverables including live URL, full source code, database configuration, and deployment documentation.
- Coordinated directly with stakeholders, clarified scope, ensured on-time delivery, and completed formal handover.
- Delivered ISO certified project documentation, versioning details, and payment/contract records.

Other Projects

- Pet Store (01/2025 – Ongoing):** Microservices-based pet e-commerce platform using Java, Spring Boot, Angular, PostgreSQL, RabbitMQ, and AI recommendation system.
- ASL Recognizer:** Deep learning based ASL detection system using Python, TensorFlow, OpenCV, Flask; **achieved 97.65%** model accuracy.

Skills

- **Languages:** Kotlin, Java, Python, JavaScript, TypeScript, SQL
- **Backend:** Spring Boot, Microservices, Node.js, Express.js, REST APIs
- **Frontend:** Angular.js, React.js, HTML/CSS, Bootstrap
- **Architecture:** Event-Driven Systems, RabbitMQ, Redis Caching, Docker, CI/CD
- **Cloud/Hosting:** AWS (S3, EC2), Vercel, MongoDB Atlas
- **Databases:** MySQL, PostgreSQL, MongoDB, Redis

Education

Master of Computer Applications — Brainware University (2022–2024)

| CGPA: **9.92 (Gold Medalist)**

B.Sc. Computer Science (Hons) — West Bengal State University (2019–2022)

| CGPA: **9.74**

Certifications & Achievements

- **PGD-SE Certification**
- MCA Gold Medalist (2024)
- **Verified project completion and handover documentation from Educare Carefully Institute (ISO-certified)**
