Professional Summary

Results driven Backend Developer with 2+ years of experience building scalable microservices, high performance APIs, and distributed systems using Java, Kotlin, Spring Boot, and event driven architectures. Proven ability to optimize system performance, integrate third party services, and deliver end to end solutions with strong ownership. Recognized for problem solving, fast learning, and delivering production ready features.

Experience

Backend Developer

Reciprocity Lab. | Sept 2024 – Present

- Developed and maintained 11+ microservices using Spring Boot (Java/Kotlin), improving system efficiency and feature scalability.
- Designed RESTful APIs with OpenAPI/Swagger, reducing integration issues by 30%.
- Integrated multiple third party APIs (payments, KYC, geolocation) enabling secure, high availability transactions.
- Implemented event driven architecture using RabbitMQ, improving asynchronous processing and system responsiveness.
- Optimized performance using Redis caching, reducing load on core DB and boosting response time by 40%.
- Contributed to UI work with Angular 19+, collaborating with product and design teams.
- Followed Agile practices, CI/CD pipelines (GitHub Actions, Jenkins), and test driven development for reliable deployments.
- Developing a high-performance WebSocket-based stock market system using Spring Boot, enabling low-latency bidirectional communication for real-time stock price updates and event-driven data streaming.

Project

Educare Carefully Institute (Version 1.0)

— Live — Certification

Delivered the complete Version 1.0 of an education-management platform which serving 15,000+ students and 50+ franchise centers, handling 20,000+ monthly requests. serving 15,000+ students and 50+ franchise centers, handling 20,000+ monthly requests.

Tech: Node.js, Express.js, Angular.js, MongoDB, Vercel, Render.

Shiva AI (Ongoing)

— Live

Developing an AI-powered spiritual assistant using Spring Boot, Ollama, and LLMs. Training domain-specific models with Shiva Puranas and implementing Retrieval-Augmented Generation (RAG) to deliver context-aware responses from Shaivism literature.

ASL Recognizer

Deep learning based ASL detection system using Python, TensorFlow, OpenCV, Flask; achieved 97.65% model accuracy.

Skills

Languages: Java, Kotlin, Python, JavaScript, TypeScript, SQL

Backend: Spring Boot, Microservices, Node.js, Express.js, REST APIs

Frontend: Angular, React, HTML/CSS, Bootstrap

Architecture: RabbitMQ, Redis, Docker, CI/CD

Databases: MySQL, PostgreSQL, MongoDB, Redis

Cloud: AWS EC2/S3, Vercel

Education

MCA, Brainware University (2022-2024) – CGPA 9.92 (Gold Medalist)

B.Sc. Computer Science, West Bengal State University (2019-2022) – CGPA 9.74

Certifications

- PGD-SE Certification
- MCA Gold Medalist (2024)
